

Map to Great Rivers Greenway Pumphouse

Although MRB tours are filling quickly, people can still get an opportunity to see construction on the new bridge. Great Rivers Greenway has renovated a pumphouse on the river that gives a great view of construction of the new Mississippi River Bridge. Since the pumphouse is outside of the construction zone, people can access it anytime during daylight hours. To get to the pumphouse:

Take Broadway to Mullanphy and turn toward the river. Take Mullanphy Street through the river wall and turn left. The pumphouse will be on the river ahead and to the right.
